

BIG DATA & AI DRIVING ENERGY SERVICES TO BUILDING SECTOR

Stay connected with us!

Newsletter Issue 4

Dear BEYOND followers! The 4th issue of the BEYOND H2020 newsletter has just arrived! In this issue, all the latest activities of the project along with valuable information about buildings' energy performance and efficiency solutions are presented. Read our issue and grab the opportunity to be informed about energy optimization in buildings!

What is the connection between energy retailers and electricity price?

It's true that retailers need to gain better insight into their customers' demand and consumption to format better pricing strategies and increase their profit. But how can retailers can do that? The BEYOND platform has the solution for this!

[read more >>](#)

Have you heard the term Smart Readiness?

SRI is important for business actors like aggregators and retailers that want to have access to detailed information about buildings and support the continuous assessment and certification of the buildings. The BEYOND platform has a specific functionality for SRI certificates. Interested in finding it out?

How easily can we predict the occupant-related energy consumption?

Many energy retailers and researchers are struggling to predict occupants' energy consumption, due to the differences in simulation with the actual consumption. The BEYOND platform can achieve this by implementing an accurate building energy performance simulation, considering fine-grained occupancy and comfort profiles of building occupants!
